*The best navigators aren't sure where they are until they get there--
and then they're still not sure. - Jimmy Buffett*

Waypoints

I've collected a few waypoints over the years that I've stored in my GPS, and they are listed here for future reference. But be aware that a GPS is not substitute for knowing how to navigate. A GPS like any electronic device can malfunction or cease to operate, and where are you then?

Always supplement a GPS with the following:

- Hand lead and line to determine depth of water
- Log chip and line to determine speed
- Watch to determine time
- Compass to determine direction
- Charts and pilot books for the coast to be cruised
- Parallel rules, dividers, and pencils
- Tide and current tables
- Sextant and navigation tables (when going offshore)
